Profile

Born in DR Congo, adopted into an Italian family, schooled in Italy, the United States and across Europe. Moving between cultures taught me to read people and situations quickly. Today I read business, culture and technology as one system, and I want to help organisations decide what to do about the changes it produces.

Experience

Project Manager, Project Launch
Maestro Immobiliare, Abano Terme, 2026

- Led launch preparation for a new digital project: priorities, planning and task follow-up across platform, marketing, content and contributors.
- Tested the platform and checked that content was ready ahead of launch.
- Kept the team aligned through direct communication and follow-up.
- Used AI and digital tools to organise information, recap meetings and turn them into operational tasks.

Ventures and projects

FWDRI, founding team of six
AI food-tech venture, H-FARM Pre-Accelerator, 2025–2026

For people with allergies, intolerances or special diets, every label is a risk. Our idea: scan a product, see at once whether it is compatible, find compatible products and restaurants. My work: competitive analysis, including Porter's Five Forces, and the business model.

CASSINI Hackathon, EU Space for Consumer Experience
Project MarkMile, 2025

A gamified outdoor-activity concept built on European satellite data. My part: business modelling and value engineering.

H-FARM student events. Organised events for students: planning, promotion and coordination.

Starting Finance. Project collaborations alongside Marco Scioli. Trip to Dubai and Abu Dhabi, February 2026.

Education and international experience

H-FARM College / University of Chichester
International Business Studies, 2025–2028, second year

Liceo Scientifico T. Olivelli, Pavia
Fifth year and Italian diploma, 2025

Hopkinton High School, Massachusetts, USA
Full fourth year near Boston and American diploma, 2023–2024

School abroad. Lyon, half of second year. Winchester, the other half, 2023. London, half of third year.

Model United Nations (NHSMUN), New York
Croatia delegation, Union for the Mediterranean: negotiation, public speaking and resolution writing in English

Where I'm heading

Strategy, market analysis and international development: understanding how cultural, economic and technological shifts change markets. Particular interest in Asia, above all China and Japan.

Where I come from

I grew up between project management and engineering. My mother, Antonella Nonnato, is an IT project manager at Fastweb, where she has led ERP and legal-merger projects in the Fastweb–Vodafone integration. My father, Fabrizio Cammisa, is an automation engineer working across application and software engineering.

Technology and AI

ChatGPT, Codex and Claude, used for research, synthesis, workflow automation, AI-assisted prototyping and content.

Google Workspace and Obsidian for running work and knowledge.

Sport

Football, MMA, kendo, volleyball, wrestling. What stays: discipline, adaptability, a clear head under pressure, teamwork.

What I follow

Cinema and human behaviour. Music and pop culture. Fashion and streetwear. Geopolitics, finance and technology.

Languages

Lingala, mother tongue. Italian, native. English, fluent. French, good intermediate: conversational and work use.
